Lab 4

(Strings)

1. Write a program to enter a string. Calculate the length of the string. Find the substring country. Count the occurences of each word in the given sentence.

If the String as input is India is my motherland. I love my country. Capital of India is New Delhi.

2. Write a program that accepts a comma separated sequence of words as input and prints the words in a comma-separated sequence after sorting them alphabetically.

Suppose the following input is supplied to the program:

without, hello, bag, world

Then, the output should be:

bag,hello,without,world

3. Write a program that accepts sequence of lines as input and prints the lines after making all characters in the sentence capitalized.

Suppose the following input is supplied to the program:

Hello world

Practice makes perfect

Then, the output should be:

**HELLO WORLD** 

PRACTICE MAKES PERFECT

4. Write a program that accepts a sequence of whitespace separated words as input and prints the words after removing all duplicate words and sorting them alphanumerically.

Suppose the following input is supplied to the program:

hello world and practice makes perfect and hello world again

Then, the output should be:

again and hello makes perfect practice world

5. Write a program that accepts a sentence and calculate the number of letters and digits.

Suppose the following input is supplied to the program:

hello world! 123

Then, the output should be:

LETTERS 10

DIGITS 3

6. Write a program which accepts a string as input to print "Yes" if the string is "yes" or "YES" or "Yes", otherwise print "No".

7. Write a program which accepts a sequence of words separated by whitespace as input to print the words composed of digits only.
Example:
If the following words is given as input to the program:
2 cats and 3 dogs.
Then, the output of the program should be:
['2', '3']
In case of input data being supplied to the question, it should be assumed to be a console input.
8. Please write a program which count and print the numbers of each character in a string input by console.
Example:
If the following string is given as input to the program:
abcdefgabc
Then, the output of the program should be:
a,2
c,2
b,2
e,1
d,1
g,1
f,1
9. Write a program that accepts a string
<ol> <li>1. 1.reverses it.</li> <li>2.checks whether it is a palindrome.</li> <li>3.checks whether it ends with a specific substring.</li> <li>4.capitalize the first letter of each word in a string</li> <li>5.check if a string is anagram of another string</li> <li>6.remove vowels from string</li> <li>7.find length of the longest word in a sentence</li> </ol>
